INTRODUCING WESTERN LIFTERS PVT LTD

Established in the year 2010 under the visionary leadership of Mr. Sachin Mirani, we proudly stand as India's leading provider of premium AWP services. Nestled in the vibrant heart of Western India, we have set industry standards by introducing the JLG 1850SJ, the tallest self-propelled boom lift, first time in India. At Western Lifters, we specialize in delivering superior aerial access solutions to a diverse array of industries including engineering, oil & gas, power plants, chemical plants, shipyards, airports, metro & monorail projects and infrastructure projects. Our commitment to quality and safety is unmatched, ensuring every project soars to new heights with efficiency and reliability. We blend innovation with reliability to cater to the diverse needs of our clientele spanning PAN India, Nepal, Sri Lanka, Bhutan, Mauritius, and Maldives.

DIRECTOR PROFILE

MR. SACHIN M MIRANI

With a vision to provide reliable & efficient manlift service in AWP rental sector, our Director begin his journey in 2010 by establishing a proprietorship firm Western India Sky Lifter. The journey started with just one 60 feet self-propelled boom lift (JLG 600S) & a single dedicated operator.

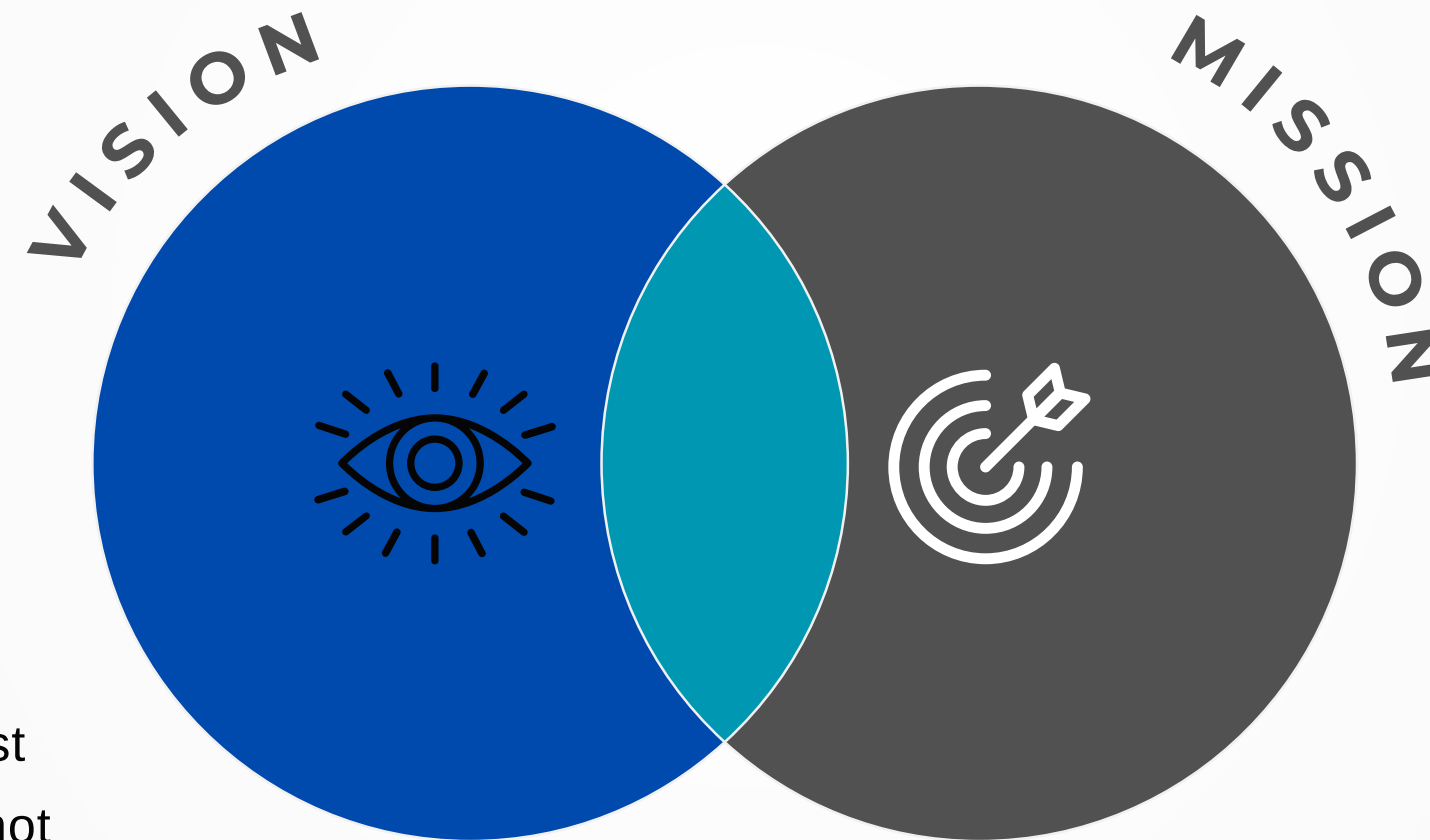

Fueled by relentless determination, industry insight & a strong commitment to service & excellence he transformed this humble beginning into a thriving company. **In 2020, he established WESTERN LIFTERS PVT LTD, making a new milestone. Today, under his dynamic leadership, the company operates a fleet of 100+ advanced equipment & employs 120+ skilled professionals.**

Headquartered in Thane (W), Maharashtra, we continue to lead the AWP rental space with safety, innovation, reliability, & exceptional service excellence.

FROM ONE EQUIPMENT TO MANY, IT'S NOT JUST GROWTH - IT'S A JOURNEY OF GRIT, TRUST, & UNWAVERING COMMITMENT !

VISION & MISSION

To transform the way the world works at heights by becoming a global symbol of trust and innovation in aerial access, delivering not just machines, but complete elevation solutions that drive progress, safety, and smarter infrastructure development.

To consistently provide reliable, safe, and professional equipment solutions that exceed client expectations, while driving innovation, operational excellence, and strategic growth across national & international markets.

EXPANSION IN SINGAPORE

In a strategic move to extend our global footprint, Western Lifters Pvt. Ltd. marked a significant milestone in 2024 by expanding operations to Singapore. This expansion reflects our unwavering commitment to delivering world-class AWP rental solutions across borders. With a focus on safety, innovation, and operational excellence, our Singapore venture is poised to serve diverse industry needs while upholding the same standards that define our success in India.

OUR MAIN SERVICE PORTFOLIO

At Western Lifters, we specialize in delivering superior aerial access solutions to a diverse array of industries including engineering, oil & gas, power plants, chemical plants, shipyards, airports, metro & monorail projects and infrastructure projects. Whether navigating complex job sites or reaching elevated work areas, our equipment ensures maximum efficiency, safety, and reliability for every project.

SELF-PROPELLED BOOM LIFTS

Our extensive fleet features two types of Self-propelled Boom Lifts, Articulated and Telescopic, available in both battery operated and diesel powered variants up to the height of 72 meters, ensuring optimal performance across diverse job site conditions.

TRUCK MOUNTED BOOM LIFTS

Our fleet includes both Articulated and Telescopic Truck Mounted Boom Lifts up to the height of 75 meters designed to deliver exceptional reach, flexibility, and performance.

SCISSOR LIFTS

Our Scissor Lift range includes battery operated, hydraulic, diesel operated, and also rough terrain scissor lifts up to 16 meters height, ensuring safe and efficient vertical access on all terrains.

SPIDER LIFTS

Our Spider Lift range includes versatile models with heights from 29 to 42 meters, designed for maximum stability and safe access even on uneven or challenging terrains, ensuring efficient operation in every environment.

OUR MAIN SERVICE PORTFOLIO

At Western Lifters, we specialize in delivering superior aerial access solutions to a diverse array of industries including engineering, oil & gas, power plants, chemical plants, shipyards, airports, metro & monorail projects and infrastructure projects. Whether navigating complex job sites or reaching elevated work areas, our equipment ensures maximum efficiency, safety, and reliability for every project.

SELF-PROPELLED BOOM LIFT

A self-propelled boom lift is an aerial work platform (AWP) designed to provide safe access to work at height. It is equipped with its own drive system, allowing the machine to be moved and positioned without the need for external towing equipment like truck, etc.

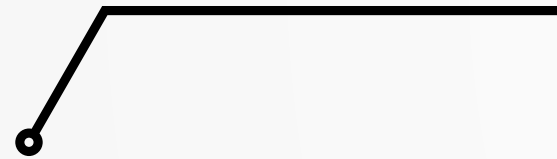

KEY FEATURES

The machine features a **telescopic** or **articulating** boom that extends both vertically and horizontally, giving operators the ability to reach elevated work areas as well as locations that are otherwise difficult to access.

TELESCOPIC & ARTICULATED BOOM LIFT

TELESCOPIC

A telescopic boom lift (also called a straight boom lift) has a straight extendable arm that grows in length like a telescope.

- It provides maximum vertical reach.
- Offers long horizontal outreach but moves in a straight line only.
- Best for jobs that require height over obstacles or long reach in open areas.

ARTICULATED

An articulating boom lift has a boom with one or more joints that allow it to bend in multiple places.

- Can reach up, over, and around obstacles.
- Provides flexibility in tight or congested areas.
- Ideal for jobs where access is restricted or blocked by structures.

TRUCK MOUNTED BOOM LIFT

A truck-mounted boom lift is an aerial work platform (AWP) where the boom lift is mounted on a truck chassis. Unlike self-propelled boom lifts, it relies on the truck for mobility, so it can travel longer distances on roads without the need for additional transport.

KEY FEATURES

The boom can be telescopic or articulating, allowing workers to reach heights and difficult-to-access areas safely.

SCISSOR LIFTS

A scissor lift is a type of aerial work platform (AWP) that provides vertical elevation for workers. It is named “scissor” because its lifting mechanism consists of folding supports in a crisscross “X” pattern, which extend and retract to raise or lower the platform.

Unlike boom lifts, a scissor lift moves straight up and down and is ideal for tasks that require vertical access rather than horizontal reach.

**DIESEL
OPERATED**

SPIDER LIFTS

A spider lift is a compact, crawler-mounted aerial work platform with stabilizing "legs" that provide stability on uneven terrain and in tight spaces where traditional lifts can't operate.

TOWABLE LIFTS

A towable lift is a type of aerial work platform that can be hitched and towed behind a vehicle, just like a trailer.

- It is lightweight and portable, making it easy to move from one location to another.
- It usually comes with outriggers (supporting legs) that provide stability when set up.
- Towable lifts are often battery or electric powered, making them quieter and cleaner to use.
- They are ideal for short jobs such as building maintenance, electrical repairs, painting, tree trimming, and cleaning where quick setup is needed.

admin@westernlifter.com

TELESCOPIC CRANES

A telescopic crane is a type of crane used mainly for lifting and moving heavy materials. It has a long boom (arm) made of sections that slide in and out, like a telescope. These sections are extended or shortened using hydraulics, which allows the crane to reach different heights.

PICK AND CARRY CRANES

A Pick and Carry Crane is a mobile crane used for lifting and carrying materials over short distances. Unlike other cranes that stay fixed in one spot while lifting, this crane can pick up a load, travel with it, and place it somewhere else without needing outriggers for support.

OUR EQUIPMENT BRANDS

From self-propelled boom lifts reaching up to 225 feet to versatile scissor lifts and specialized spider lifts designed for confined spaces, we offer solutions tailored to meet your specific project requirements. Benefit from our extensive fleet featuring top-tier equipment from global leaders such as-

Global Leaders Like:

JLG, GENIE, GEMINI, SINOBOOM, HAULOTTE, SKYJACK, MULTITEL, CTE, LEVO, ZOOMLION, PALFINGER, HIDROKON, MANITOU, SNORKEL, LIUGONG, LGMG, DINGLI, JINWOO, JQCM, HORYONG, SANY, FALCON

WESTERN

WHY WESTERN LIFTERS PVT LTD ?

From Self-Propelled to Truck Mounted Boom Man Lifts up to 225 Feet, and versatile Battery or Diesel Operated Scissor Lifts, we cater to diverse project requirements. With a comprehensive service network spanning across India, we ensure prompt support wherever your projects take you. - At our state-of-the-art workshop in Taloja, Navi Mumbai, our operators and technicians undergo rigorous training adhering to OEM standards.

- ✓ Extensive Equipment Range from Top Global Brands
- ✓ Nationwide Service Network
- ✓ Commitment to Quality
- ✓ Dedicated Team

Great heights are reached responsibly & safely, not by taking chances & risks!
